### **PROJECTS**

#### **QuickRunner Website**

Multi shop ordering platform

Client project completed solo

<https://quickrunner.shop>

- Designed and developed a full stack MERN ordering platform for a real business client.
- Built a system that allows multiple shops to post and manage products from one platform.
- Implemented add to cart functionality with structured cart handling.
- Integrated WhatsApp based order forwarding to send carts directly to delivery runners.
- Deployed and maintained the application in a production environment.

#### **Fresh Fashion Website**

E commerce product showcase

Solo project

<https://freshfashion.co>

- Built a responsive product showcase website with detailed product pages.
- Integrated WhatsApp ordering for smooth customer communication.
- Developed an admin panel for monitoring statistics and managing site operations.

#### **Zemen Event Management System Website**

Team project

<https://zemen-events.netlify.app>

- Contributed to the development of a web based event management system.
- Implemented event registration modules and admin management features.
- Improved system reliability and overall user experience through collaboration.
